Subject:	Workspace module breaks with error			

Description

Workspace module breaks with error:

Argument 1 passed to TYPO3\TYPO3CR\Domain\Model\Node_Original::createProxyForContextIfNeeded() must implement interface TYPO3\TYPO3CR\Domain\Model\NodeInterface, null given, called in /XX/Data/Temporary/Production/Cache/Code/Flow_Object_Classes/TYPO3_TYPO3CR_Domain_Model_Node_Original.php on line 406 and defined",
"/XX/Data/Temporary/Production/Cache/Code/Flow_Object_Classes/TYPO3_TYPO3CR_Domain_Model_Node_Original.php

This error is seen when I deleted a page node from the tree and when I went to publish this deletion in Management->Workspaces this error is seen and I am just locked.

+1, I also have this when cutting and pasting a node, for example. When pasting, the XHR fails with 500, and when reloading the whole page, that "huge" exception occurs preventing one to even clean thing up.

I cannot reproduce the original error anymore (and neither can Pankaj). I suppose this has been fixed by something else by now.
@Adrian: cut, copy and paste are not working at all right now, so I can't reproduce your bug. could you check again when they are fixed if this still occurs?
