Subject:	Missing TRUE Validator for mandatory checkboxes		
Description			
<p>I added a Validator which validates boolean TRUE values. So only the value TRUE is accepted. I needed this for a form where i have a mandatory "terms and conditions" checkbox which is a boolean property. I think this is a quite common usecase and should be included into the core.</p>

[FEATURE] A boolean value Validator

A new Validator for validating if a value is a specific boolean value (TRUE or FALSE). Used with no options it expects TRUE.

Mainly useful for validating mandatory checkboxes in forms (like Terms and Conditions).
