we have also problems with empty sessions after the update to 4.5.23 in several installation. 4.5.22 works fine.  
in the checkout process from tt\_commerce the billing address got lost.

The backport to 4.5 and the follow-up change (that is still pending)  
introduce a feature and changed behaviour in the guise of being a bugfix.

Since the situation in 4.5 was working before (maybe not optimal, but on  
the other side not faulty), I opt for reverting the initial backport  
completely in 4.5 without any substitute.
