

TemplaVoila - Bug # 45583

Status:	Resolved	Priority:	Should have		
Author:	Franz Geiger	Category:	Frontend Rendering		
Created:	2013-02-18	Assigned To:			
Updated:	2015-03-11	Due date:			
TYPO3 Version:	4.7				
PHP Version:	5.3				
Has patch:	No				
Reporter:					
Is Regression:	No				
Affected Version:					
Subject:	improper render of sectionIndex				
Description					
<p>Hi,</p> <p>in TYPO3 4.7 <code>css_styled_content</code> changed the way how a <code>indexSection</code> gets rendered (<code>tt_content.menu.20.3</code>).</p> <p>Issue #37449 describes how that brakes index sections for some people. At least in my case this could be due to <code>templavoila</code>'s user function (<code>tx_templavoila_pi1->tvSectionIndex</code>).</p> <p>Is it possible that <code>templavoiala</code> 1.8.0 doesn't play along with the new rendering of index sections in <code>css_styled_content</code>?</p> <p>Regards,</p> <p>Franz</p>

History

#1 - 2013-02-27 08:31 - Christian Nölle

Mh, having issues with the section index as well right at the moment. Using TV 1.8 with 4.5.latest gives us no output at all. Sitemap et al is working fine.

#2 - 2013-02-27 10:14 - Franz Geiger

That doesn't seem to be the same issue. In the described issue the `sectionIndex` has output. Though the header of the `sectionIndex` gets repeated instead of displaying headers of all sections on this site.

#3 - 2013-03-04 13:22 - Christian Nölle

Forget about my addition to this issue, my bug was handmade and has nothing to do with the initial issue. Sorry about that.

#4 - 2013-04-16 15:26 - Francois Suter

Franz, I can confirm this.

It is due to the fact that the rendering of the Section Index menu changed in the Core. It used to be a CONTENT cObject and method tx_templavoila_pi1->tvSectionIndex reused the "renderObj" property to do its rendering. That does not exist anymore. To make TV work again as before it would have to be added again in ext_localconf.php, in that piece of code:

```
//sectionIndex replacement
$tvSetup[] = 'tt_content.menu.20.3 = USER
tt_content.menu.20.3.userFunc = tx_templavoila_pi1->tvSectionIndex
tt_content.menu.20.3.select.where >
tt_content.menu.20.3.indexField.data = register:tx_templavoila_pi1.current_field
';
```

#5 - 2013-04-16 15:38 - Gerrit Code Review

Patch set 1 for branch **master** has been pushed to the review server.

It is available at <https://review.typo3.org/20004>

#6 - 2013-04-16 15:40 - Francois Suter

BTW if you want your project's status to be automatically updated when a patch is submitted to Gerrit, you need to set the "gerrit-review" as a member with role "Bot".

#7 - 2013-04-16 15:54 - Gerrit Code Review

Patch set 2 for branch **master** has been pushed to the review server.

It is available at <https://review.typo3.org/20004>

#8 - 2014-01-17 14:52 - schmitz no-lastname-given

With Patch 2 the output looks better for me, but the last element on the site is never displayed (as long as the section index plugin ist enabled).

So I have to put an empty content element underneath the existing ones to get all elements displayed...

I use TV 1.8.0 and TYPO3 6.1.7

EDIT:

I've copied the part of css_styled_content 4.6 in my new Typoscript to get it work:

```
tt_content.menu = COA
tt_content.menu {
    20 = CASE
    20 {      # "Section index (pagecontent w/Index checked - liststyle)"
        3 < styles.content.get
```

```

3 {
  wrap = <ul class="csc-menu csc-menu-3">|</ul>
  select.andWhere = sectionIndex!=0
  select.pidInList.override.field = pages
  renderObj = TEXT
  renderObj {
    fieldRequired = header
    trim = 1
    field = header
    htmlSpecialChars = 1
    wrap = <li class="csc-section">|</li>
    typolink.parameter.field = pid
    typolink.section.field = uid
  }
}
}
}
}

```

- Category set to Frontend Rendering
- Is Regression set to No

#10 - 2014-12-01 17:59 - Jan Roth

- Assigned To set to Christian Nölle
- Target version set to 2.0.0

It seems that tt_content.menu.20.3 not longer have renderObj config in 6.2 (replaced with stdWrap....) hope it is not an extension in our installation, maybe others have seen this too? Christian?

- Target version deleted (2.0.0)

Hello,

I'm having issues with the section index, it creates duplicate content, please see screenshots

TYPO3 6.2.10, Templavoila 1.9.3

Troubles also with 6.2.9 and TV 1.9.2

The fix from "schmitz no-lastname-given" (<https://forge.typo3.org/issues/45583#note-8>) corrects rendering but "unlinked" contents are displayed.

Can we have a fix that works with TYPO3 6.2 please ?

#13 - 2015-03-05 10:45 - Christian Nölle

Can confirm this as well. 6.2.10 is creating duplicate content with 1.9.2. and 1.9.3

#14 - 2015-03-10 13:13 - Alexander Schnitzler

- *Target version set to 1.9.5*

#15 - 2015-03-10 13:16 - Alexander Schnitzler

- *Status changed from New to Resolved*

Will be resolved in 1.9.5, to be released soon.

@Sebastien Convers: Once you installed 1.9.5 make sure, you do not include the sitemap element in the section index, as this causes the recursion.

#16 - 2015-03-11 07:48 - Christian Nölle

This stopped not only the duplicate rendering, but also stopped the rendering of the menu altogether :/ Or am I doing sth wrong? Section index is not populated anymore for same page or for other selected page...

#17 - 2015-03-11 08:43 - Alexander Schnitzler

Do you have time war a skype/phone call today? I get different responses regarding the patch. Sebastien wrote me an email and said, that the recursion didn't stop, you do say sth. completely different. Maybe I did oversee an important detail when creating the bugfix.

#18 - 2015-03-11 08:44 - Christian Nölle

Ay, no prob. Got no skype, so contact me via phone or jabber. Got my details?

#19 - 2015-03-11 08:45 - Alexander Schnitzler

Nope, but ping me on twitter and/or slack.

#20 - 2015-03-11 08:53 - Sebastien Convers

- *File 49.png added*

- *File 02.png added*

Hello !

So, after my mail : I exclude the menu from section index, and it seems to stop the recursion.

But like Christian, it's not working for other selected page AND it does not generate section links but display all the content from the page, you can see my screens :)
