

TYPO3.Kickstart - Bug # 45647

Status:	Resolved	Priority:	Must have
Author:	Bastian Waidelich	Category:	
Created:	2013-02-20	Assigned To:	Bastian Waidelich
Updated:	2013-06-24	Due date:	
Affected Flow version: Git master			
Subject: Controllers must not be of scope singleton			
Description			
<p>Currently all the controllers of Flow (and the ones that you create via the kickstarter) are of scope singleton (e.g. contain the <code>@Flow\Scope("singleton")</code> annotation).</p> <p>Usually that doesn't really make a difference, because controllers are only instantiated once.</p> <p>But if we start using the same controller multiple times (say two plugin instances on one page) we'll get really weird effects..</p> <p>BTW: For command controllers it's obviously OK to be singletons, but there is no advantage in doing so</p>

Revision 35bd7a3a - 2013-05-08 11:35 - Bastian Waidelich

[BUGFIX] Controllers must not be of scope singleton

Adjusts the controller templates to create prototypes instead of singletons.

Background:

Usually the scope of a controller doesn't really make a difference, because they are only instantiated once per request.

But if the same controller is used multiple times (e.g. within two plugin/widget instances on one page) the side effects could be very confusing.
