

TYPO3.Flow - Bug # 45669

Status:	New	Priority:	Should have
Author:	Carsten Bleicker	Category:	
Created:	2013-02-20	Assigned To:	
Updated:	2013-02-20	Due date:	
PHP Version:			
Has patch:	No		
Complexity:			
Affected Flow version: Flow 2.0.0 beta 1			
Subject:	PersistentObjectConverter does not convert ValueObjects by __identity		
Description			
<p>if you have valueObjects and want to show them in an action controller with showAction(\$myValueObject) and get param comes in with &myObject[__identity]=123123-123123-231231 the converting fails because __identity will allways be unset and no other property left after this. i solved this by simply adding 3 lines in the convertFrom method:</p> <pre>// if there is just only the identity we convert the source to string if (is_array(\$source) && count(\$source) === 1 && array_key_exists('__identity', \$source)) { \$source = \$source['__identity']; }</pre> <p>see also attached extended class with higher priority</p> <p>do you agree with it? thank you carsten</p>
