Revision fa457505 - 2013-07-15 22:26 - Aske Ertmann

[FEATURE] Add client side validation of node properties

This change adds validation for the vie entities (nodes).
This is done by overwriting the default VIE entity validation
with a custom validation mechanism. It adds all the validators
from Flow that are implementable in JavaScript, except the
Number and a more complex DateTime validator.
