Status:	Accepted	Priority:	Must have
Author:	Vincent	Category:	File Abstraction Layer (FAL)
Created:	2013-02-28	Assigned To:	
Updated:	2015-07-17	Due date:	
TYPO3 Version:	6.0		
PHP Version:	5.4		
Complexity:	hard		
Is Regression:	No		
Sprint Focus:	On Location Sprint		
Subject:	image replacement, width and height are kept even i change my image		
Description			
I try to change my logo.png for another one. The problem is that when I try to replace the logo with the new one in the rte. It's keeping the original width and height in the img tag. I also change the width and height in apparence tab and it doesn't change a thing. Thus my image doesn't look it supposes to. If i want it to be the corrects sizes i have to rename my logo.png to something different, like logo2.png.
