

TYPO3.Flow - Bug # 45936

Status:	Resolved	Priority:	Should have
Author:	Aske Ertmann	Category:	Resource
Created:	2013-03-01	Assigned To:	
Updated:	2013-05-02	Due date:	
PHP Version:	5.3		
Has patch:	No		
Complexity:	easy		
Affected Flow version:	Git 2.0		
Subject:	Respect open basedir during uploading of files		
Description	<p>Currently when uploading files and using "open_basedir", you either have to change the "upload_tmp_dir" value or add the temporary folder to "open_basedir". Since the latter is not recommended for security reasons and for shared hosting environments the former can be impossible, it should work without having to do so since PHP allows for that.</p>

[BUGFIX] Handle open basedir properly during file upload

This solves the issues of uploading files when using open_basedir restriction. Instead of having to add the temporary upload directory (upload_tmp_dir) in the open_basedir configuration, which is a bad idea, this ensures that it works even though the open basedir restricts access to the temporary upload directory.

Make sure that the temporary upload directory is writable to test this issue.
