

Core - Bug # 46007

Status:	Resolved	Priority:	Must have		
Author:	Henrik Ziegenhain	Category:	File Abstraction Layer (FAL)		
Created:	2013-03-04	Assigned To:			
Updated:	2013-03-05	Due date:			
TYPO3 Version:	6.0				
PHP Version:	5.3				
Complexity:					
Is Regression:					
Sprint Focus:					
Subject:	Downloads with Whitespaces in Foldername fails after Migrate				
Description					
<p>In the past download links set via RTE are stored in DB like this:</p> <p><link fileadmin/user_upload/pdf/10Ratgeber%20%2B%20Anleitungen/file.pdf _blank download "Leitet Herunterladen der Datei ein">Download</link></p> <p>When I edit the Content Element with the above mentioned link I get the attached Exception.</p> <p>In my eyes this issue is caused by the whitespaces in the foldername. Renaming the dir to "10Ratgeber_Anleitungen" and editing the path manually with phpmyadmin solves the problem.</p>

History

#1 - 2013-03-04 12:04 - Henrik Ziegenhain

Maybe related to #45490

#2 - 2013-03-04 12:11 - Henrik Ziegenhain

The attached patch at #45490 from Marc Bastian Heinrichs solves this issue.

#3 - 2013-03-05 00:51 - Michael Stucki

- Status changed from New to Resolved

As this seems to be a duplicate of #45490, I am closing this issue.
