TYPO3.Flow - Bug # 46097

Status:	New	**Priority:**	Must have
Author:	Stephan Herold	**Category:**	Session
Created:	2013-03-07	**Assigned To:**	Robert Lemke
Updated:	2013-03-07	**Due date:**	
PHP Version:			
Has patch:	No		
Complexity:			
Affected Flow version: Git master			
Subject:	Logged in user gets session of an other logged in user		
Description			

We (lets say our coustomer) discovered a strange behavior with the session handling.

An logged in user updated an object, was redirected to the 'index' and had the session of an other also logged in user.
It seems like some sort of session hijacking.

Due to the fact, that we work in 'production' mode we could not cover the bug throug logs.
But the projectmanager, wich was informed by the user, confirmed this behavior.

Affacted version typo3/flow-base-distribution dev-master (last updated 15.01.2013).

Might affect 2.0 as well.
