Is Regression:			
Sprint Focus:			
Subject:	Notification emails not translated for default recipients		

Description
Context class : Tx_Workspaces_ExtDirect_ActionHandler   getRecipientList(…) calls (Tx_Workspaces_Service_Stages)->getResponsibleBeUser to get the default recipients from the stage configuration,   then sets lang info for each of those recipients using unserialized 'uc' field or 'lang' field.   Problem is that getResponsibleBeUser(…) only returns the following fields : 'username', 'uid', 'email', 'realName'.   So neither 'uc' nor 'lang' fields are available and lang information is NULL, resulting notification emails in default language.

History

#1 - 2013-06-12 16:38 - Oliver Hader

- Status changed from New to Accepted

- Priority changed from Must have to Should have

#2 - 2013-12-10 00:58 - Michael Stucki

- Category set to Workspaces

#3 - 2013-12-10 01:02 - Michael Stucki

- Project changed from Workspaces & Versioning to Core

- Category changed from Workspaces to Workspaces

#4 - 2014-10-29 15:44 - Mansoor Ahmad

Similar issue is also in TYPO3 Version 6.2.6.

The notification email is in default language,

if the editor change the status "Ready to Publish" and send it to admin editor for review and publish.
