Revision 663572c4 - 2013-09-29 20:52 - Frans Saris

[FEATURE] Implement date time editor

The current jQuery UI datepicker is replaced by a more lightweight version with time picking support.

The datetimestripicker uses a 'shadow field' so internal storage of the date is done in an internal format (US for now), and displaying is done in a format which could be user specific.
