<b>Subject:</b>	Plugins with Views should resolve their Links automatically		
<b>Description</b>	<p>Through the Concept of Plugins and PluginViews (#45013) links need to be rewritten to a different PageNode if the current PluginView/Plugin on this Page isn't supposed to render the Controller/Action that a link it pointing to.</p> <p>The main goal of this is a simple way to have List/Detail Actions on different PageNodes without to much manual Configuration hassle.</p>
