Updated:	2010-10-20	**Due date:**	
Has patch:			
Subject:	Enhance the textbox viewhelpter to be capable of type=password		
Description			

Currently it's not possible to use the textbox viewhelper to render a password (i.e. <input type="password"...) textfield.
Due to possible changes of namespaces during develepment specifying it by "hand" is very error-prone thing.
