

Core - Bug # 46535

Status:	Resolved	Priority:	Should have		
Author:	Oliver Hader	Category:	File Abstraction Layer (FAL)		
Created:	2013-03-22	Assigned To:			
Updated:	2013-03-27	Due date:			
TYPO3 Version:	6.0				
PHP Version:	5.3				
Complexity:					
Is Regression:					
Sprint Focus:					
Subject:	Image rendering of non-existing files throws exception				
Description					
<p>Rendering an image that has no accordant file in a storage in the frontend (e.g. in TypoScript) fails with an exception like "Object with identifier xyz does not exist in storage" (1329647780).</p> <p>Sure, the file does not exist in that case, but throwing an exception that is not caught is too much.</p> <p>Besides that \$cObj->getImgResource() already catches \TYPO3\CMS\Core\Resource\Exception - which does not cover RuntimeExceptions.</p> <p>Solution:</p> <p>Throw a \TYPO3\CMS\Core\Resource\Exception instead of a RuntimeException in these cases. A new ResourceDoesNotExistException is introduced to cover files and folders.</p>

[BUGFIX] Image rendering of non-existing files throws exception

Rendering an image that has no accordant file in a storage in the frontend (e.g. in TypoScript) fails with an exception like "Object with identifier xyz does not exist in storage".

A new ResourceDoesNotExistException is introduced to cover files and folders and is thrown instead of RuntimeException. This way, the exception is caught in the ContentObjectRenderer and the frontend rendering just does not output the error, which is logged instead.
