- Category set to Duplicate
- Status changed from New to Rejected
- TYPO3 Version changed from 4.7 to 4.5

Actually this is a core bug, since the core is using copy and move actions while importing but is not able to differentiate between importing and real editor actions.

This is why each hook related to these actions gets involved even though this should be avoided during the import.

I provided a patch for that behaviour, which might still not be merged into the current releases of the TYPO3 core though:

<http://forge.typo3.org/issues/36031>

BTW: Grid Elements are already aware of that behaviour and will work as soon as the patch has been applied.
