Updated:	2013-07-06	**Due date:**	
Subject:	Page which is hidden in menu should get own icon		

Description

Pages which are 'hidden in menus' are recognized by the pagetree. They have the same icon like normal pages.

They should get a new icon which is to create. The suggestion was to take the normal page icon with a reduced oppacity and a dotted outline.

Hello Markus

There is already a way to display that a page is hidden in index by making it 50 % transparent. This is a general concept, which works for pages, shortcuts, folders, hidden pages etc., so we shouldn't introduce a special icon for pages. What's missing is live update of this when changing the state in the inspector, because that was only just introduced.

#3 - 2013-07-06 13:10 - Tim Kandel

- Status changed from New to Closed

- % Done changed from 0 to 100

This can be closed now that we switched to Font Awesome
