Subject:	[FEATURE] Add ConfigurationProcessors for ContentTypes		
Description	<p>ContentType Configurations are currently only statically loaded from the yaml Configuration. In order to dynamically add PluginViews to the static ContentTypes i suggest to add a ConfigurationProcessor that's invoked while constructing a ContentType to dynamically extend the existing ContentTypes.</p>		
Syntax	<pre>'TYPO3.Neos.ContentTypes:PluginView': superTypes: ['TYPO3.Neos.ContentTypes:ContentObject'] label: 'Plugin View' group: 'Plugins' showUneditableOverlay: false configurationProcessors: - '\TYPO3\Neos\ContentTypes\OptionsProvider\PluginViewsConfigurationProcessor' properties: []</pre>

[FEATURE] NodeType configuration postprocessing

To add dynamic properties and configurations to the node type configuration this change adds the concept of NodeType postprocessors that can be added to modify node type configurations.

Resolves: #46680
