

## TYPO3.Neos - Bug # 46682

<b>Status:</b>	Closed	<b>Priority:</b>	Should have
<b>Author:</b>	Adrian Föder	<b>Category:</b>	
<b>Created:</b>	2013-03-26	<b>Assigned To:</b>	Christian Müller
<b>Updated:</b>	2014-10-04	<b>Due date:</b>	
<b>Subject:</b>	Redirecting to a Request pointing to a Neos node does not work		
<b>Description</b>			
<p>in Neos' FrontendNodeRoutePartHandler's resolveValue(), the intended node is found out the following way:</p> <pre>\$contentContext = \$this-&gt;nodeRepository-&gt;getContext(); if (\$contentContext-&gt;getWorkspace(FALSE) === NULL) {     return FALSE; } \$node = \$contentContext-&gt;getCurrentSiteNode()-&gt;getNode(\$matches['NodePath']);</pre> <p>The node Repository's Context is more or less "side-effectly" set while the Router calls FrontendNodeRoutePartHandler's matchValue(), this again calls</p> <pre>\$this-&gt;nodeService-&gt;getNodeByContextNodePath(\$requestPath);</pre> <p>followed by creating the live workspace.</p> <p>However, when calling redirectToRequest(), it looks like the routing part is somewhat skipped (is that correct?), hence no such context is prepared.</p>			
<b>Update</b>			
Probably the actual reason or issue is that <b>building</b> an URI leads to these problems if there is no such context available.			

### History

#### #1 - 2013-03-26 11:51 - Adrian Föder

- Subject changed from Redirecting to a Request with a cached route does not work to Redirecting to a Request pointing to a Neos node does not work

#### #2 - 2013-04-10 21:39 - Aske Ertmann

- Status changed from New to Accepted

I agree that the content context could probably be set in a way with fewer side effects, but I don't have any plan on how to do so at the moment. Just to clear up, this problem occurs when trying to create links from plugin or module when the content context hasn't been set on the node repository, IIRC.

#### #3 - 2013-04-10 21:47 - Christian Müller

- Assigned To set to Christian Müller

That is probably the same bug that Robert had. I knew this would come back at some point. We need a reliable way to make sure we set a context.

**#4 - 2013-07-12 08:55 - Adrian Förder**

could have been resolved with <https://review.typo3.org/#/c/21250/>

**#5 - 2013-07-12 13:12 - Aske Ertmann**

- *Target version set to 1.0 beta 1*

**#6 - 2014-10-04 13:20 - Jonas Renggli**

- *Status changed from Accepted to Closed*

Changes have been merged.

This should be fixed since Neos 1.0.0 and 1.1.0
