Revision 0d34f7f0 - 2013-03-31 18:52 - Stefan Neufeind

[TASK] Detect APC and APCu correctly

APCu is just the user-data part of APC,
providing the same API.

If installed it currently identifies itself
as both "apcu" and "apc" (for compatibility).
Thus if "apcu" shows up, we actually have an APC
without opcache-support.

Resolves: #46821

Releases: 4.5, 4.7, 6.0, 6.1

History

#1 - 2013-03-31 17:47 - Stefan Neufeind

<http://pecl.php.net/package/APCu>

Functions : same API as APC.

This is a (friendly) fork of APC, dedicated to clean-up code from all the cache side of opcode and to provide an alternative permitting to supersede APC in a transparent manner to applications.

- *Status changed from New to Under Review*

Patch set 1 for branch **master** has been pushed to the review server.

It is available at <https://review.typo3.org/19462>

#3 - 2013-03-31 18:38 - Stefan Neufeind

Could somebody turn this from "feature" into a "task" please? See patch in review. The API is identical, APCu is just "an APC without opcache-functionality".
