Updated:	2013-09-18	**Due date:**	
Sprint:			
PHP Version:			
Has patch:	No		
Complexity:			
Subject:	Detect APC and APCu correctly		

Description

APCu is just the user-data part of APC,
providing the same API.

If installed it currently identifies itself
as both "apcu" and "apc" (for compatibility).
Thus if "apcu" shows up, we actually have an APC
without opcache-support.

Added in TYPO3 CMS 6.1, so it would be great if you could adopt something similar as well.
