<b>Subject:</b>	Custom identifiers are not working anymore		
<b>Description</b>			
<p><a href="https://review.typo3.org/#/c/18954/">https://review.typo3.org/#/c/18954/</a> introduced a regression that prevents entities with custom identifier columns to be working correctly.</p> <p>The actual issue is probably, that the "PersistenceMagicAspect" introduces the "Persistence_Object_Identifier" even if the entity contains a custom identifier. By checking for that property first, <b>PersistenceManager::getIdentifierByObject()</b> will always return a UUID regardless of the actual identifier – breaking links and such.</p>

#### Revision cd38544b - 2013-04-04 16:14 - Bastian Waidelich

[BUGFIX] Reintroduce support for entities with custom id properties

This adjusts the pointcut expressions of the PersistenceMagicAspect to introduce UUID identifiers only to entities that do not contain custom identifier properties (annotated with @ORM\Id).

This change also refactors the unit tests and adds functional tests for the aspect.
