Grid Elements - Bug # 46952

Status:	Closed	**Priority:**	Must have
Author:	Stefan Farnetani	**Category:**	Versioning and workspaces
Created:	2013-04-05	**Assigned To:**	
Updated:	2013-04-06	**Due date:**	
TYPO3 Version:	4.7		
PHP Version:			
Subject:	Gridelements not working correctly with workspaces		

Description

Hi,

when working in the draft-mode of workspaces it is not possible to create via drag and drop an content-element inside a gridelements column. I can create an element and then move it via drag and drop inside the gridelement.

Furthermore in the frontend all content-elements were rendered in the first column of the gridelement.

After pushing the elements to live-mode. The content-elements inside the gridelements are seperated from the containing gridelement.

gridelements v1.4.0
TYPO3 4.7.10

This is a duplicate.

The behaviour you describe is caused by bugs of the TYPO3 core related to IRRE and workspaces, not by Grid Elements.
Unless you are going to use a patched core you will have to wait until the core team members decided to merge the pending patches that have already been provided by Oliver Hader.
