

## TYPO3.Fluid - Bug # 47078

<b>Status:</b>	Closed	<b>Priority:</b>	Must have
<b>Author:</b>	Adrian Föder	<b>Category:</b>	Widgets
<b>Created:</b>	2013-04-09	<b>Assigned To:</b>	
<b>Updated:</b>	2013-04-10	<b>Due date:</b>	
<b>Has patch:</b>	No		
<b>Affected Flow version:</b>	Git master		
<b>Subject:</b>	widget.uri/linkViewHelpers fail with CSRF protection		
<b>Description</b>	<p>the ViewHelper's getAjaxUri() method lacks the addition of a Csrf protection token, which results into an Access Denied exception when calling the linked action.</p> <p>To me, the question is if the CsrfToken should be added in that case to the Ajax URI; or rather regard that in the \TYPO3\Flow\Security\RequestPattern\CsrfProtection.</p>		
<b>Related issues:</b>	duplicates TYPO3.Flow - Bug # 27798: CSRF protection not working for forms in... <b>Accepted</b> <b>2011-07-01</b>
