

TYPO3.Neos - Bug # 47109

Status:	Resolved	Priority:	Should have
Author:	Aske Ertmann	Category:	
Created:	2013-04-10	Assigned To:	Aske Ertmann
Updated:	2013-04-30	Due date:	
Subject:	Logging in after session timeout leads to exception		
Description			
Exception: http://i.imgur.com/iHq7vyu.png http://i.imgur.com/7TsiGOI.png			
How to reproduce			
This can be reproduced by setting the setting TYPO3.Flow.security.session.inactivityTimeout very low and then login to the backend. Then wait for the inactivity timeout has been reached and trigger an AJAX call (e.g. open inspect tree). Then reload the page and login.			
The problem			
The reason for this problem is that the last request which finds out that session has expired is an ExtDirect call, so even though the last request is to the node controller, the intercepted request was the ExtDirect one, so that's where you'll be redirected after you gain access (login).			
Solution			
Check if the original request is a ExtDirect request and if so use the default redirect instead.

[BUGFIX] Logging in after session timeout leads to exception

This happened when the request invalidating the session after timeout was an ExtDirect request and that being stored as the original request, which was then redirected to after logging in again.
