PHP Version:			
Has patch:	No		
Complexity:			
Affected Flow version: Git 2.0			
Subject:	\$roleRepository not initialized correctly		
Description			
The \$roleRepository is set "manually" in initializeRolesFromPolicy() - only if caches are outdated. But the \$roleRepository is needed even if the caches are up to date, so this breaks (one way to see the effect is to try and create a Neos user on the CLI).

[BUGFIX] Initialize \$roleRepository correctly

The \$roleRepository is set "manually" in initializeRolesFromPolicy() - only if caches are outdated. But the \$roleRepository is needed even if the caches are up to date, so this breaks.

This change moves the initialization outside the check.
