Subject:	Neos creates "unstructured" nodes on error		
Description	<p>When an error occurs during insertion of content elements in the content module (e.g. some exception when inserting a plugin) Neos displays this exception nicely as notification:</p> <p>ExtDirect error: Uncaught exception ...</p> <p>At the same time the CE node is created with nodetype = "unstructured" breaking everything on reload. The only way to restore neos is (AFAIK) to remove the broken node from the database manually..</p>
