TYPO3.Flow - Bug # 47229

Status:	Resolved	**Priority:**	Must have
Author:	Adrian Föder	**Category:**	
Created:	2013-04-15	**Assigned To:**	Adrian Föder
Updated:	2013-04-15	**Due date:**	
PHP Version:			
Has patch:	Yes		
Complexity:			
Affected Flow version: Git master			
Subject:	System roles become namespaced in configuration manager		
Description			

the system roles, Everybody and Anonymous, get a namespace and become, for example, TYPO3.TYPO3CR:Everybody in the ACLs section. This can easily be seen when calling ./flow configuration:show --type Policy on a Neos project.
I'll provide a patch (suggestion).

Revision f71d9f1c - 2013-04-15 12:39 - Adrian Föder

[BUGFIX] System roles don't get a package namespace

The role change I39f335baa01fbe9b883e98e85cb1f063bbaf5744
introduced the automatic prepend of the package namespace
where the role has been defined; except for system roles
which are at the moment Anonymous and Everybody.

For ACLs, however, the package namespace has been prepended
also for the system roles. This fixes that behavior.
