

TYPO3.Flow - Bug # 47232

Status:	Resolved	Priority:	Must have
Author:	Philipp Maier	Category:	Property
Created:	2013-04-15	Assigned To:	Philipp Maier
Updated:	2013-04-16	Due date:	
PHP Version:	5.4		
Has patch:	No		
Complexity:	easy		
Affected Flow version:	Git master		
Subject:	Property mapping fails for Account::roles		
Description			
Hi,			
following error is thrown when the PropertyMapper tries to map the roles.			
<pre>#1297759968: Exception while property mapping for target type "SomeModel", at property path "accounts.0": Catchable Fatal Error: Argument 1 passed to TYPO3\Flow\Persistence\Doctrine\Proxies__CG__\TYPO3\Flow\Security\Account::setRoles() must be an array, object given.</pre>			
This is mainly because the typehint in the function setRoles is <array> while the property itself is annotated as Doctrine Collection. Changing the typehint to \Doctrine\Common\Collections\Collection seems to fixes this problem.

[BUGFIX] Property mapper can again map account roles

Due to the type hint in the setter method of roles, the property mapper was unable to set the converted property.

For the time being a TypeConverter can be used as a workaround.
