

## TYPO3.Flow - Bug # 47271

<b>Status:</b>	Closed	<b>Priority:</b>	Should have
<b>Author:</b>	Andreas Wolf	<b>Category:</b>	AOP
<b>Created:</b>	2013-04-16	<b>Assigned To:</b>	
<b>Updated:</b>	2014-12-15	<b>Due date:</b>	
<b>PHP Version:</b>	5.4		
<b>Has patch:</b>	No		
<b>Complexity:</b>			
<b>Affected Flow version:</b>	Git master		
<b>Subject:</b>	Advices for parent class' methods throw warning when called in subclass		
<b>Description</b>	<p>I have a structure with a parent class and several subclasses. I want a before advice for all set* methods of these classes.</p> <p>Some methods from the parent class are invoked on objects of the subclass.</p> <p>When having the advice before the set* methods, the following error occurs:</p> <p>Notice: Undefined property: MyPackage\Domain\Model\MySubclass::\$Flow_Aop_Proxy_targetMethodsAndGroupedAdvices in .../Data/Temporary/Development/Cache/Code/Flow_Object_Classes/MyPackage_Domain_Model_MyClass.php line 629 where MyClass is the parent class of MySubclass.</p> <p>The reason seems to be that the AOP properties of a class are marked as "private", which makes them inaccessible from parent (and subclass) methods. I don't know if this could/should be solved by changing the type to protected, as this might raise other issues (I'm not too deeply into the AOP code of Flow), but AFAIS this is a possible solution.</p>		

### History

**#1 - 2013-05-21 13:09 - Robert Lemke**

- Target version set to 2.0.1

**#2 - 2014-12-15 13:05 - Bastian Waidelich**

- Status changed from New to Closed
