Updated:	2013-05-21	Due date:	
PHP Version:			
Has patch:	No		
Complexity:			
Subject:	Support mapping properties with differing types for setter and property		
Description			
<p>If a property and it's setter have different "input" types, e.g. the property is a Collection but the setter accepts an array, mapping currently fails. It would be nice if the mapping, class schema and related parts would be clever enough to support that...</p>
