Associated revisions

Revision 812ee6f8 - 2009-12-04 10:12 - Sebastian MichaelSEN

[+API] Extbase Kickstarter: Added domainObject for Persons and corresponding Unit Tests (Credits to Christoph Dähne)
[+FEATURE] Extbase Kickstarter: Apply Author Data to domainObject.phpt and extEmconf.phpt, relates to #4736
[+API] Extbase Kickstarter: Added domainObject for Actions
[+FEATURE] Extbase Kickstarter: Scaffolding Action Controller for every Domain Objects that has defined actions
[+FEATURE] Extbase Kickstarter: Scaffolding Action templates for each Domain Object
[+FEATURE] Extbase Kickstarter: Creating a .htaccess file in Resources/Private/ to protect that directory
[~TASK] Extbase Kickstarter: Several Code Cleanups

History

#1 - 2009-12-03 01:32 - Sebastian MichaelSEN

- File extauthor.diff added

My patch

- Adds Author, AutorEmail and AuthorCompany to the Extension Model and applies the data to domainObject.phpt and extEmconf.phpt
- Includes two minor CGL fixes in the extbase_kickstarter code
- Includes a CGL fix in the generated domain object code

It just takes one person (the last one to be exactly) which is a project manager and assumes it is the "main" person. Sure there has to be a better logic behind it in the future. Which one of the defined persons is the "main" person can be influenced in Tx_ExtbaseKickstarter_ObjectSchemaBuilder

#2 - 2009-12-03 08:13 - Sebastian Kurfuerst

Hey Sebastian,

it'd be great if you could merge your patch with the one from #5593, as that one is well unit-tested, but does not update the ext_emconf yet. Additionally, all authors should be added to the COPYRIGHT and into the Ext EMconf etc.

Greets and thanks for your work,
Sebastian

#3 - 2009-12-03 11:14 - Sebastian MichaelSEN

- *File merged.diff added*

#OBSOLETE, PLEASE SEE V2#

I attached a new patch:

- Includes #5593
- Applies Author Data to domainObject.phpt and extEmconf.phpt (other files to come..)
- Introduces an Action Domain Object
- Scaffolding Action templates for each Domain Object (still empty)
- Creating a .htaccess file in Resources/Private/ to protect that directory
- Includes two minor CGL fixes in the extbase_kickstarter code
- Includes a CGL fix in the generated domain object code

Note: In Tx_ExtbaseKickstarter_ViewHelpers_ListObjectsByPropertyCSVViewHelper (what a name!) i used eval() which I consider generally as bad coding style. Maybe someone could help me to get rid of it.

#4 - 2009-12-03 14:44 - Sebastian Michaelsen

- *File merged_v2.diff added*

I attached a new patch:

- Includes #5593
- Applies Author Data to domainObject.phpt and extEmconf.phpt (other files to come..)
- Introduces an Action Domain Object
- **Scaffolding Action Controller for every Domain Objects that has defined actions**
- Scaffolding Action templates for each Domain Object (still empty)
- Creating a .htaccess file in Resources/Private/ to protect that directory
- **Fixed strange indentation in Tx_ExtbaseKickstarter_ObjectSchemaBuilder_testcase**
- Includes two minor CGL fixes in the extbase_kickstarter code
- Includes a CGL fix in the generated domain object code

Note: In Tx_ExtbaseKickstarter_ViewHelpers_ListObjectsByPropertyCSVViewHelper (what a name!) i used eval() which I consider generally as bad coding style. Maybe someone could help me to get rid of it.

#5 - 2009-12-07 09:48 - Sebastian Michaelsen

- *Category set to Code Creation*

#6 - 2009-12-08 09:43 - Sebastian Michaelsen

- *Status changed from New to Accepted*
- *Assigned To set to Sebastian Michaelsen*
- *Target version set to 0.1*

#7 - 2011-01-07 08:32 - Rens Admiraal

- *Tracker changed from Bug to Task*
- *Target version deleted (0.1)*
- *Parent task set to #11986*

#8 - 2011-01-08 18:26 - Nico de Haen

- Status changed from Accepted to Resolved

Can not see any errors. Propbably this was resolved during the refactoring
