<b>Has patch:</b>	No								
<b>Affected Flow version:</b>	(any)								
<b>Subject:</b>	Error Classes are only set for form fields in object context								
<b>Description</b>	<p>Fluid won't set error classes for form fields when they are not in object context ("property" attribute is not set). I experienced the issue in v4 and have no FLOW running to verify it, but from looking at the code I'm pretty sure this is not v4 specific.</p> <p>Here's the workaround I did for my v4 project: <a href="https://gist.github.com/smichaelsen/5416046">https://gist.github.com/smichaelsen/5416046</a></p>

Truely sorry for the huge delay, this was a tricky one (because it is a breaking behavior).. But I just moved this to <https://jira.typo3.org/browse/FLOW-213> and take care of it right now
