This can be tested now by using the fork of TYPO3.Media ()

Add this to your root composer manifest:

```
"repositories" : [  
  {  
    "type": "git",  
    "url": "https://kdambekalns@github.com/mgoldbeck/TYPO3.Media.git"  
  }  
]  
  
...  
  
"require": {  
  ...  
  "typo3/media": "dev-asset-model as dev-master"  
}
```

composer update will pull in the changes and a flow doctrine:migrate will adjust the schema as needed. If you want to go back, migrate down first and then go back to the original code.

The github PR has been merged, the "dev-asset-model" alias is no longer needed.
