| **Subject:** | Add support for CollectionStringCastTransformer | | |
| **Description** | | | |

Currently the implementation doesn't support property with type array. I have a small path to add a transformer class to cast collection objects to string. A small modification need to be done in the objectIndexActionRequired, because array_diff_assoc is used to compare the two array. This function has no support for multi dimensional array

[TASK] Add support for CollectionStringCastTransformer

Currently the implementation doesn't support property with type array. I
have a small path to add a transformer class to cast collection objects
to string. A small modification need to be done in the
objectIndexActionRequired, because array_diff_assoc is used to compare
the two array. This function has no support for multi dimensional array
