

Base Distribution - Task # 47610

Work Package # 45020 (Closed): Content Editing Stability and Features

Status:	Closed	Priority:	Should have
Author:	Karsten Dambekalns	Category:	Content Editing
Created:	2013-04-26	Assigned To:	Rens Admiraal
Updated:	2014-11-02	Due date:	
Subject:	If page tree is expanded, new content element chooser is shifted to the right		
Description	<p>See screenshot for a "description"...</p> <p>This issue occurs because the overlay is absolute positioned to follow the element. What we should do is to have a dom element with position relative and add the overlays inside those, because they would then follow the body margins added by the neos backend.</p>		

History

#1 - 2013-05-08 22:39 - Rens Admiraal

- Assigned To set to Rens Admiraal

#2 - 2013-07-04 19:03 - Sebastian Kurfuerst

- Status changed from New to Closed

not relevant anymore

#3 - 2014-11-02 18:22 - Aske Ertmann

- Remaining (hours) set to 0.0
