How did you upload the file? Normally if you do it by the BE module, space should be removed.

#2 - 2013-04-27 11:08 - Frans Saris

:-) thats right but there are more ways to get files into the fileadmin.

I moved some sample files on my test system. And I know that on some of the live system there where people with ftp access so there will be a lot of legacy files that didn't went by the fileupload meganisme.

I will have a look at it and come up with a patch if it is a media issue. Or report it if it is a core issue.
