Subject:	Move \$TYPO3_CONF_VARS['DB'] to the TOP of All Configuration		
Description			
<p>The database can now be changed also in All Configuration - scroll down complete to the bottom - This point should be the first point and not the last as without DB Typo3 won't work - so it is the most important part!</p> <p>To have it at the bottom is very unlogical!</p>

- Status changed from New to Needs Feedback

For 6.2 this has been improved. If the database connection fails and you enter the Install Tool it will automatically show the database settings to get the database connection fixed. IMO this is what you wanted to achieve with this ticket, right?

- *Target version changed from 6.1.1 to 6.2.0*
- *PHP Version set to 5.4*
- *Complexity set to easy*

With 6.2 the sections are collapsed, no endless scrolling anymore.

Pushed patch additionally orders the sections alphabetically (like in LocalConfiguration.php).
