Sprint Focus:			
Subject:	Drag & drop in page-modul: Does not work in "Languages"-mode		

Description
Works fine in columns-mode but there is no drag-functionality in "Languages"-mode. Maybe just some missing CSS-class or so?

In PageLayoutView.php the dragitem-class is just added if we're not in languages-mode. So I guess there were some problems to it.
Drag&drop in page-module was added in commit d62fb10e.

- Target version set to 7.4 (Backend)

- Is Regression set to No

#3 - 2015-07-13 10:54 - Riccardo De Contardi

I just tested with 6.2.14 and 7 (master). As far as I can see it works in both cases, but there is a difference:

in version 6.2.14 it is possible to drag a CE from the alt language column to the main language column and vice versa (and it works fine, I mean, the language is updated), while in 7 this is forbidden.

I don't know if this is it a missing feature or it is the intended behavior.
