[!!!][TASK] TemplateImplementation shouldn't modify the request

TemplateImplementation now uses an extended template view that allows overriding the package for the resource interceptor.

This change should have no impact on rendering but the request package inside the template is no longer different than in the original action request.

The change is breaking if you rely on using viewhelpers like `uri.resource` without giving a package key, as the request package now will be `TYPO3.Neos` instead of your site package. Relative resource paths will still be rewritten to your site package.

Resolves: #47970

Change-Id: `le749ae1696d3ae9e2daf3bb98c4bf59c87e6c869`
