Updated:	2014-11-02	**Due date:**	
Subject:	Change default generated node paths when changing the node title		

Description

A default node path is generated when creating a new node, we should change this automatically when a node with a title property is changed if it still has the default node path. This is to make it easier for the editor to get nice URL's. For now we should however not change this automatically if the title changes and the node path is not a generated one, because we lack a good way to support redirects from old URL's.
