Subject:	Moving of nodes across levels should not show the same node twice		
Description			

If having a node structure in live workspace, and MOVING a node into another
parent node, this is copied into your personal workspace.

In neos, the moved node is then shown **twice**: First from the user workspace (correct), and from the live workspace (wrong!).

It only breaks for fetching **collections** of nodes, but that's what we do in Neos all the time.

[BUGFIX] Fix moving of nodes across workspace levels

Adds a check for moved nodes in your workspace while fetching
child nodes and also introduces dql to make this check faster.

Also implements test cases which show this behavior.
