[BUGFIX] Ignoring of inheritance type in FlowAnnotationDriver broken

Due to weird circumstances the tests for the FlowAnnotationDriver were skipped for a while, and change le6e46efa858a651b2f1fe4b08d78039249504dea broke the functionality to disable inheritance of no subclasses exist for a class annotated with an InheritanceType annotation.

This changes fixes that.

[BUGFIX] Broken inheritance type handling in FlowAnnotationDriver

This reverts commit 93fbe9fc8d789547f05eec2b4945eb6c565fa3fa because it broke more than it was supposed to fix.

The failing test that led to the original "fix" was in fact broken and is fixed with this change.

After applying the changeset the persistence (load/update/create) of subclasses fails, if you use a repository to the corresponding abstract super class. Doctrine tries to persist all the properties of the super class for the table of the sub class.
