

DEV3 - Bug # 484

| | | | |
|--|--------------------------------|---------------------|----------------------------|
| Status: | Accepted | Priority: | Should have |
| Author: | David Bruehlmeier | Category: | New Package Wizard (FLOW3) |
| Created: | 2008-04-29 | Assigned To: | David Bruehlmeier |
| Updated: | 2010-10-20 | Due date: | |
| Subject: | Set focus on package key field | | |
| Description | | | |
| <p>When opening the "New Package Wizard", the focus is set on the "folder" field, even if it has been filled with the value from the current selection. In this context, it would be nicer if the focus was directly set on the "package key" field.</p> | | | |
