

TYPO3.Kickstart - Bug # 4847

Status:	Resolved	Priority:	Could have
Author:	Daniel Hofstetter	Category:	
Created:	2009-10-01	Assigned To:	Karsten Dambekalns
Updated:	2010-10-20	Due date:	
Affected Flow version:			
Subject: Lowercase package name causes an unexplained exception when using kickstart package			
Description			
<p>I'm currently following the "Getting started" tutorial and while creating my first package, I used, by accident, "blog" as package name (instead of "Blog" as in the tutorial):</p> <pre>./flow3 kickstart package blog</pre> <p>This causes the following error:</p> <pre>Uncaught FLOW3 Exception #1220722210: The package key "blog" is invalid thrown in file /home/dho/projects/flowtutorial/Packages/Framework/FLOW3/Classes/Package/Manager.php in line 238</pre> <p>It would be helpful to mention what the criteria are for a valid key.</p> <p>I'm using the "Getting started" package with flow3 alpha 4.</p>

Revision 6ebd9e7a - 2010-01-18 11:25 - Karsten Dambekalns

[+BUGFIX] Kickstart: When an invalid package key is used, a proper error message is shown, fixes #4847.

History

#1 - 2009-10-02 10:02 - Karsten Dambekalns

- Project changed from *TYPO3.Flow* to *TYPO3.Kickstart*
- Category deleted (*Error*)

#2 - 2009-10-02 10:05 - Karsten Dambekalns

- Subject changed from *Lowercase package name causes an exception when using flow3 kickstart* to *Lowercase package name causes an unexplained exception when using kickstart package*

The actual problem is that the exception is not caught and transformed into a helpful error message.

#3 - 2010-01-18 11:23 - Karsten Dambekalns

- Status changed from *New* to *Accepted*
- Assigned To set to *Karsten Dambekalns*
- Target version set to *1.0.0 alpha 7*

#4 - 2010-01-18 12:02 - Karsten Dambekalns

- *Status changed from Accepted to Resolved*

- *% Done changed from 0 to 100*

Applied in changeset r3657.
