TYPO3.Neos - Bug # 48496

Status:	Resolved	**Priority:**	Must have
Author:	Simon Schaufelberger	**Category:**	
Created:	2013-05-23	**Assigned To:**	
Updated:	2013-09-30	**Due date:**	
Subject:	javascript errors in ContentModule-built.js		

Description

on my fresh installation with neos on my windows machine and dev mode i get the following error right after opening the neos backend:

    Uncaught TypeError: Object #<Object> has no method 'ready'
    Uncaught TypeError: Cannot read property 'success' of undefined

the original request is made from:

    _Resources/Static/Packages/TYPO3.ExtJS/JavaScript/ext-direct.js

and neos shows a notification:

    ExtDirect error: Unable to connect to the server.

Hi Simon,

Do you still have this error when using the current GIT master?

/Mattias

#2 - 2013-07-11 23:12 - Aske Ertmann

- Status changed from New to Needs Feedback

- Assigned To set to Simon Schaufelberger

#3 - 2013-07-11 23:28 - Simon Schaufelberger

that bug is fixed now.

but now i get a different error when loading the page tree:

Uncaught TypeError: Cannot read property 'success' of undefined in PageTree.js:164

I have a **very slow** windows and i think the timeout of the ext direct call needs to be increased because after some time, i get the notification: ExtDirect error: Unable to connect to the server and the loading icon in the page tree is rotating forever and i never see the page tree.
