| **Subject:** | errorAction() of the MVC ActionController doesn't work correct | | |

**Description**

Line 350 of the file ActionController.php doesn't work.

There is the old class "flashMessages" in use.

    $this->flashMessages->add($errorFlashMessage);

I've changed this line into

    $this->flashMessageContainer->add($errorFlashMessage);

and the errorAction works again.
