

TYPO3.Flow - Bug # 48873

Status:	New	Priority:	Should have
Author:	Bernd Helbig	Category:	- Error Handler Report -
Created:	2013-06-05	Assigned To:	
Updated:	2013-06-05	Due date:	
PHP Version:	5.3		
Has patch:	No		
Complexity:	easy		
Affected Flow version:	Flow 2.0.0 beta 2		
Subject:	Error when calling resourceManager->deleteResource on unpublished Resource		
Description			
<pre>\$fileResource = \$this->resourceManager->importUploadedResource(\$fileUpload); //extracting info here, works fine \$this->resourceManager->deleteResource(\$fileResource);</pre>			
This currently causes:			
Warning: Invalid argument supplied for foreach() in /flow/Data/Temporary/Development/Cache/Code/Flow_Object_Classes/TYPO3_Flow_Resource_Publishing_FileSystemPublishingTarget.php rget.php line 158			
No big deal breaker, since one can delete the file manually using the same code as is inside deleteResource(), skipping the whole unpublish part, but should be fixed in any case.
