

TYPO3.Flow - Bug # 48898

Status:	New	Priority:	Must have
Author:	Rafael Kähm	Category:	Security
Created:	2013-06-05	Assigned To:	Christian Müller
Updated:	2013-06-05	Due date:	
PHP Version:			
Has patch:	No		
Complexity:			
Affected Flow version: Git master			
Subject:	configuration for roles fails if one of Policy.yaml files contain empty "roles array"		
Description			
<p>If some package has Policy.yaml with empty <i>roles</i>: like this</p> <pre>1 roles: 2# Test: [] 3# this is last line of this yaml</pre> <p>then drains this package the array with roles empty.</p> <p>\TYPO3\Flow\Configuration\ConfigurationManager::loadConfiguration() @row 382 Arrays::arrayMergeRecursiveOverrule() merges all roles defined in all Policy.yaml files in \$configurations['roles'] array. and Arrays::arrayMergeRecursiveOverrule() overrides per default full array with empty array. @param boolean \$emptyValuesOverride If set (which is the default), values from \$secondArray will overrule if they are empty (according to PHP's empty() function)</p>
